TODAY'S Pontiac Six is the most impressive example
of value-giving in the whole history of the low-priced
six!

Substantial gains in motoring pleasure and economy
result from important mechanical advancements, such
as a new Marvel carburetor, new manifold, etc. More
intriguing beauty and the much desired air of rugged
compactness have been achieved by the use of smaller,
smarter wheels and larger tires.

And, beneath all its brilliance of beauty and perfor-
mance, Pontiac Six is a supremely dependable car—
a car that sails through a warring, tearing, day-long
drive and finishes with the same spirited freshness with
which it started the trip.

Come in and investigate this amazing car—General
Motors' lowest-priced six.

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

Alberta Pool Elevators Earn Million Dollars

Cheques distributing this sum
to members who patronized
their own facilities will be
in the mail shortly.

The Alberta Pool Elevators
announce the distribution of
approximately one million dol-
lars excess earnings from last
year's operations. This sum
will be distributed to Pool mem-
bers who patronized their own
facilities and on the following basis:

2 cents per bushel for wheat
shipped over the platform to
Pool terminals.

3½ cents per bushel on wheat
special binned in Pool elevators.

1 cent a bushel on wheat de-
livered to Pool elevators on the
cash ticket basis.

Cheques covering the distribu-
tion will be in the mail in the
course of the next few days.

This sum is available from
excess earnings of the Pool ele-
vator system, and the setting
up of an allowance for certain
contingencies.

An idea of the benefit of the
Pool elevator system may be
obtained from the following
figures:

Pool members who special
binned their grain in Pool ele-
vators paid 2½ cents a bushel
handling charges on delivery of
their grain and will now have
3½ cents a bushel returned to
them.

Pool members who loaded
grain over the loading platform
and consigned it to the Pool at
its terminals paid ¾ cent and
will have 2 cents a bushel re-
turned to them.

Pool members who disposed
of their grain by the cash ticket
method paid an average of
4½ cents per bushel and will
have 4 cents returned to them,
but they had the advantage of
an immediate payment and of
guaranteed grades.

Will Pay Farm Storage

During the present crop year
the directors of the pool have
arranged to pay farm storage
of 1 cent a bushel for wheat de-
livered after December 15, and
an additional 1 cent a bushel
for wheat delivered after Janu-
ary 15, in order that an induc-
ement may be offered to mem-
bers to hold their grain on their
farms until the heavy rush is
over. The idea is to permit
Pool elevators to handle a larger
volume of pool grain, thus
extending the benefit over a
greater portion of the member-
ship. It should be clearly un-
derstood that the maximum
amount payable for farm stor-
age will be 2 cents a bushel.

Take a chance! Value for
your money guaranteed at the
"Post Office" sale of parcels
mailed from the Four Corners
of the Earth. Also home cook-
ing, candy and farm produce.
Saturday, September 29, at J.
L. Acheson Hardware, under
the auspices of group 1, Oyen
Ladies Aid. Proceeds toward
church building fund.

Oyen's Fall Chautauquia will
be held this year on November
20, 21, 22 and 23.

The Hat Shoppe

Mrs. R. E. Gillespie's fall mil-
linery opening, held last Friday
and Saturday, was well attend-
ed. The display included a
large number of beautiful hat
creations which reflected this
capable milliner's ability and
good taste. The chic models
shown represent the very latest
modes in ladies and misses head
gear and the ladies of Oyen and
district are very fortunate in
having such an establishment
in town as the Hat Shoppe,
where they can personally select
becoming millinery.

Mrs. Gillespie's good taste is
further shown in the manner in
which the hats are displayed
and the general artistic arrange-
ment of her Shoppe, which
would be a credit in a much
larger centre than Oyen. New
stocks are being continually
added and you may be reason-
ably sure to find at her estab-
lishment, just the very hat you
want for fall or winter wear.

The Impatient West

Twenty-five years ago the population of the three prairie provinces was considerably less than one million people; today it is well over two million people.

Nevertheless Western people talk of the slow growth in population, and are severely critical of the Government at Ottawa, irrespective of its political complexion, and the immigration policies which have prevailed.

Twenty-five years ago Manitoba was largely an undeveloped province, while the Provinces of Saskatchewan and Alberta were yet to be born. This vast territory being known as the North-West Territories, lacking a fully autonomous form of government, and without many of the institutions, services and conveniences enjoyed by the people in other parts of the Dominion.

Today these three provinces are as well organized, as up-to-date, as well served in most respects and better in some, than the older provinces. During these twenty-five years the production of the West has doubled and trebled and re-trebled; hamlets have become villages, villages have grown into towns, towns have developed into modern cities; municipal systems have been created; health and education have been advanced; courts of justice have been organized; thousands of schools have been erected; high schools, collegiate institutes and universities established; great elevator systems have been created; the telephone has been carried into the most humble rural home.

The old ox-cart, the wagon, the buggy, has given way to the automobile; the single furrow plough and yoke of oxen has been superseded to a large extent by the tractor and gang plough; the winding trails leading across the prairie, up hill, down dale, and through the valleys to the far distant little railway station, calling for days and nights on the road to market a load of grain, have been converted into well built earth roads, graded to a standard, with bridges and culverts eliminating the old mudholes. Tens of thousands of miles of these good market roads have been built in the last ten or fifteen years, and millions of dollars thereof saved to the people of these provinces.

But are the people satisfied? Not a bit of it. The West is well developed, properly graded and constructed road, with good drainage, bridges and culverts replaced the old rutted trail and ungraded road, the people were enthusiastic and more than satisfied. But the best of earth roads makes hard going after days of rain, and roads which were regarded as eminently satisfactory even three or four years ago, are now roundly criticized and condemned because they are not all-weather roads.

The West is impatient. In many respects it is an excellent quality. The West is not and never will be content with less than the best. And what it wants, it wants immediately. It is impatient at delay. Take this matter of roads. If other provinces, states and countries can have gravelled roads and paved roads, why can't the West have them? Well, the West can have them if the people of the West are prepared to pay the price. But Ontario and Quebec, and the States to the south, and the countries of Europe did not enjoy hard-surfaced highways when they were only twenty to thirty years old, and when their populations were small, and their accumulated wealth not great. These things came to them gradually. But the West is impatient. We are living in an age of rapid improvement, and the West must have everything others have irrespective of its numbers or wealth.

It is not sufficient that in twenty-five years the West has created great provinces out of virgin territory, and supplied its people in that short space of time with institutions, public service and conveniences such as other older, and wealthier lands took hundreds of years to provide. Thus it is that in Alberta the U.P.A. Government, under Premier Brownlee, the Liberal Government, under Premier Gardiner, in Saskatchewan, and the Bracken Farmers' Government, in Manitoba, have all under fire because they have not gravelled or paved many thousands of miles of roads, although in order to do so the public debts of these provinces would have been enormously increased and the taxes imposed much heavier.

And no sooner are roads gravelled than a new demand is made. In Manitoba complaint is now made that these gravelled roads are too dusty, and the Government of that Province is called upon to remedy this condition. In Saskatchewan, a request is made that there should be paved roads provided, running from the United States boundary through the province to the northern edge of settlement, and that at least two other paved roads should be constructed high across the province from east to west—a good thousand miles of paved highway at a cost of many millions of dollars.

And along with the demand for more roads, better roads, gravelled roads, oiled roads, and roads which are coupled the demand for reduced licence fees for automobiles, and the rebate to municipalities of a goodly portion of the money now collected; in a word, for reduced taxation on the people. It is a peculiar situation. All Governments being urged to spend millions more to collect very less.

Yes, the West is impatient, and at times, apt to be a bit inconsistent, too.

World Eliminate Functions

A new type of wheel having two tires, one within the other, and said to be adaptable either to motor or trolley cars was exhibited recently. The outer tire is of solid rubber, the other, inside it, is of pneumatic and is incased in a steel frame to the hub. This arrangement is said to take the strain from the outer tire while the inner tire acts as a shock absorber. Functions are also eliminated.

Leading Athletes

find Minard's Ideal for preventing stiff muscles and for lessening the pain of strained ligaments.

MINARD'S
"KING OF PAIN"
ANALGESIC

Bicycles Popular in Holland

Bicycles are popular in Holland, where there is one to every 2½ inhabitants. This is attributed to the fact that there are practically no hills in Holland. The importance of the machine is recognized by the authorities in that they provide separate bicycle roads running parallel to the other roads.

Helping the Doctor

Dr. Charles H. Mayo, now tells in complete detail just exactly how to run a newspaper and the Ohio State Journal is thinking of writing a two-column editorial on the technique of removing the gall bladder, in case he'd like to know.

Agriculturists Are Contented

"I talked with at least one hundred farmers," said Senator Shindler of the United States, after concluding a trip through Western Canada, "and I failed to find one who was in any way dissatisfied."

Courtesy opens many doors and lack of courtesy leaves them open.

Decrease In Fish Catch

Production In Canada During July Less Than Last July

A decrease in the total catch of sea fish on both Canadian coasts has been reported during July last as compared with July, 1927. In July last the total catch amounted to \$7,072,802, valued at \$2,712,332, as against \$7,451,000 pounds valued at \$3,186,624 during July, 1927.

On the Pacific coast, the catch of halibut during the month of July was viewed as 3,008,200 pounds; while the catch of the preceding year was 3,712,400 pounds.

COMPLETELY RUN DOWN

Symptoms That the Blood Is Thin Should Not Be Neglected

Weak, run-down, lacking strength, energy and ambition, nervous sleepless, poor appetite, digestive disturbance, these are the symptoms named by a great majority of people who have been benefited by the use of Dr. Williams' Pink Pills. These tonic pills correct the condition described and if you have any of these symptoms you should give these pills a trial. Their great merit is that they of this kind is shown by the statement of Mr. Thomas H. Williams, U.S.N., who says: "I was completely run down in health. My blood was thin and weak, and I was told that I did not sleep well at night. My appetite was poor and the blood exertion left me weak and trembling. When I went out in the morning I was headachy, and would have to lie down as soon as I got in the house. A friend of mine told me to try Dr. Williams' Pink Pills. I soon found they were helping me, and in a few days I had taken the sixth box I felt like a new woman, and have enjoyed good health ever since. For the same reason, I can highly recommend the pills to anyone run-down or troubled with their nerves."

Did you Dr. Williams' Pink Pills help the nerves. Their main function is to enrich and increase the blood, and as the blood is the life of the body, new life is given to the entire system. Better sleep, stronger nerves, improved appetite, increased vigour, all these can be obtained by taking Dr. Williams' Pink Pills. Begin today. Sold by all medicine dealers, or by mail from Dr. Williams' Medicine Co., Brockville, Ont.

Pictures From Arctic Cruise

Having completed her annual cruise into the ice-filled waters of the Straits to within 600 miles of the north pole, the S.S. Beothic, of the Canadian Government, Arctic expedition of 1928, has returned safely. The literary, the ship followed a course of more than 7,000 miles, spent under conditions of extreme severity. This voyage was made in six weeks.

Like a Grip At the Throat. For a disease that is not classed as fatal but is probably more likely to cause more terrible suffering than asthma, there is no more reliable remedy than Dr. Kelley's Asthma Remedy. It immediately relieves the restricted air passages as if by magic. It is sold by dealers everywhere.

Fruits in Peace River Country

Plums, apples, raspberries and other fruits are now being grown in the Peace River country, 200 miles north of Edmonton. Successful experiments in respect of these fruits were conducted at the Dominion Experimental Farm at Beaverlodge.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surface. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Lodge: "Did you ever see anything so unostentatious as the water in Laundry: 'Well, there's your bill!'"

ATTENTION, WOMEN OF MIDDLE AGE!

Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Brynor, Alberta.—"The Change of Life was the trouble with me. I was run-down, thin, weak and could not sleep, had a poor appetite and did not do much. I was taking Lydia E. Pinkham's Compound and I feel like a new woman. I saw it advertised in the papers and tried it and Lydia E. Pinkham's Sanative Wash. I have recommended it to a lot of women friends." Mrs. W.M. GOODKEY, Brynor, Alberta.

Wheat Pool Advance Is 85c.

Initial Payment To Be Fifteen Cents a Bushel Less Than Last Year
The Canadian Wheat Pool will this year advance to its farmer members an initial payment of 85 cents a bushel on wheat, basis No. 1 Northern at Fort William. This advance is 10 cents a bushel less than last year, and reflects the caution of the Pool management arising out of the fact that Western Canada is now harvesting the greatest wheat crop in its history.

The Canadian Wheat Pool, which controls the world's largest supply of exportable wheat, make an initial payment to its members when the wheat is delivered. Three other payments are made during the year and are determined by the price realized in the foreign market. The initial payment is therefore no indication of the total amount the farmer will eventually receive.

It is announced by the Wheat Pool management that they are starting the new crop year with old stocks practically sold out.

Import Game Birds

King-Necked Pheasants From Oregon Introduced In Idaho

Forty-four pairs of king-necked pheasants have been imported from Oregon, for the Medicine Hat Fish and Game Association. The birds will be placed in pens, already prepared for them on the property of the farm on Ross Creek. The young pheasants are about three months old, and are of a beautiful size of a full grown Hungarian Pheasant, although considerably longer in the leg. They are a lively lot and are expected to do well. The Association is now in possession of 44 birds altogether. It has been secured from the eggs shipped here in the spring. It is proposed to keep all the birds in confinement for breeding purposes and thus be in a position to furnish several hundred, in the fall of 1929, along the creek beds and river flats.

Recipes For This Week

(By Doty Barclay)

SALMON BLAT CRUQUETTES

Can of salmon, 3 hard-boiled eggs, finely-minced celery, 1 large white potato, boiled and cooled; sprinkle well with paprika and add salt of color. Mix well with just enough French dressing to form into croquettes. Roll each croquette in finely-ground nut meats and serve on lettuce leaves with salmon dressing made from 1 cup of salmon rubbed through a colander into a plain mayonnaise dressing.

GRIDDLE CAKES

2 cups flour.
1 tablespoon baking-powder.
1 teaspoon salt.
3 tablespoons sugar.
1½ cups milk.
1 egg.
3 tablespoons melted butter.
Orange marmalade.

Mix and sift dry ingredients; add beaten egg and milk; beat thoroughly, and add butter. Drop, by hand spoonfuls, on hot griddle that has been rubbed over with a piece of butter, which will prevent cakes from sticking without the use of butter or grease. When griddle-cake is puffed, flip of bubbles, and cooked on edges, turn, and cook on other side. Spread cakes with orange marmalade; roll up like jelly-roll; sprinkle with sugar, and serve at once.

Corps are painful growths. Ingrowing Corns Remove will remove them.

Record Breaking Air Mail Cargo

18,000 lbs. of Mail Carried By Fleet of Planes
A fleet of 18 airplanes, each laden with a half a ton of mail, landed at the municipal airport at Chicago recently and established what is believed to be a new record for shipments by air mail. The fleet, chartered by a Lansing, Mich., manufacturing firm which sent out almost 350,000 pieces of mail in their record-breaking cargo, carried approximately 18,000 pounds.

The Lansing Company's postage on the shipment amounted to more than \$15,000.

Montreal's Population

Montreal's population is 323,255, according to the estimate contained in the 1928-29 Montreal directory. Greater Montreal is estimated to have a total population of 1,174,461.

"Unquestionably" contains all the five vowels, but "statematically" contains them all in order.

Building Model Farms

In Reclaimed Areas

Government Scheme To Stimulate Land Sales In Sumas, B.C.

To stimulate the sale of British Columbia Government land in the Sumas reclamation area, Provincial officials are about to establish three model farms, with buildings and complete equipment, to be sold as going concerns. The proposal, as outlined by Hon. E. D. Barrow, Minister of Agriculture, is that three complete farm units shall be created on choice Sumas land at Government expense. In every way they will be models of modern agricultural methods, with houses, barns and machinery. It is believed they will be sold without difficulty, but the main purpose is to attract farmers to the district and to encourage the establishment of first-class farms of similar character there.

Mother Graves' Worm Exterminator

will drive worms from the system without injury to the child, because its action, while fully effective is mild.

Carried Out Old Tradition

The astronomical clock at Hampton Court, said to be more than 400 years old, is traditionally supposed to stop when a resident of the place is about to die.

Recently the clock stopped. Lady McGregor, who has lived in the palace for more than 40 years was the last to look for an accident barely a week later.

Veterinarians use Minard's Liniment.

B.C. Salmon Pack

The British Columbia salmon pack this year totaled 519,359 cases compared with 325,562 cases up to the same date a year ago.

Strength!

There's a giant of power in each of these famous batteries. You can't beat an Eveready Hot-Shot for heavy duty ignition work—gas engine, tractor or marine.

Crank once, and off you go! Gives millions of fat hot sparks before replacement is necessary. Metal case protects power supply from rain, fog or damp, and assures you full value for your money. Metal case Hot-Shots in 6, 7½ and 9 volt sizes.

Built and guaranteed by Canada's largest battery manufacturing plant. Eveready on each battery. If it's not an Eveready, it's not a Hot-Shot.

WORLD HAPPENINGS BRIEFLY TOLD

The engagement of King Boris, of Bulgaria, to Princess Yvonna, of Italy, is reported.

Reductions ranging from a nickel to 50 cents a bottle are effective in Saskatchewan liquor prices, according to the price list issued by the Saskatchewan liquor board.

Attempts are being made to organize a meeting of countries directly interested in evacuation of the Rhine-land. It is understood in League of Nations circles.

Only one-fifth of an inch of rain fell in Vancouver, during the month of August, making it the driest August since the taking of records commenced in 1905.

The Canadian Mail Contractors Association in convention at Toronto, decided to urge abolition of the contract system and the institution of a salary basis of \$70 per year per year.

The New South Wales cabinet has approved the proposal of the state agricultural department, to import high quality Aberdeen Angus cattle from Canada as part of a scheme to improve the export beef trade, particularly baby beef.

The U.S. department of agriculture has lifted the embargo on dairy products passing through Montreal. The embargo was placed in effect during a typhoid fever outbreak in the Canadian city. It originally covered 200 miles but has been decreased from time to time.

A new list of broadcasting stations in Canada has just been issued by Radio Branch, Department of Marine and Fisheries. A careful reading shows that there are four new licenses, while one station has dropped its license, bringing the total number of licenses in Canada to seventy-six. This list supplements the list issued late in June.

Missionaries can explain their religion. The hard part is to explain their civilization.

Little things console us because most of our affections are little ones.

ECZEMA BROKE OUT IN PIMPLES

Had to Keep Hands Out of Water, Cuticura Heals.

"Eczema started with an irritation and soreness between my fingers. Later it broke out in small pimples which were red and full of water. I had to keep my hands out of water, and could not do my regular work. The itching and burning sometimes kept me awake at night."

"A neighbor recommended Cuticura Soap and Ointment so I sent for a free sample. After using it I discovered the trouble was disappearing. I purchased more, and my hands were perfect after using one cake of Cuticura Soap and one box of Cuticura Ointment." (Signed) Miss Mollie Hanna, Oshawa, Sask., Oct. 10, 1927.

Use Cuticura to heal itching eruptions. Send Box Two by Mail. Address: Cuticura, Toronto, Ont. Write for free sample.

Fraser River Gold

After more than half a century of neglect, the gold gold-bearing bars of the Fraser River are being extensively prospected again and mining men predict a new era of intensive development on this famous mineral-rich stream. Not since the early sixties has the Fraser been prospected so thoroughly as now.

The man who praises the baby always wins the mother's smile.

Farmers' Marketing Tour

Canadian National Railway's Tour To Great Britain and Denmark, 1928

(Continued.)

It was not far from Craigie Mains to Inverlorn, the home of Mr. Thomas Barr, the Ayrshire cattle breeder, where, incidentally, we learned that our leader, Mr. Ayr, had spent part of his honeymoon!

It is safe to say that none of us had ever seen a finer herd than that which was shown to us. These heavy, deep-milking cows, every one a picture of what an Ayrshire ought to be. The 70 cows in milk average between 800 and 1,000 gallons, with one yielding 1,800 gallons, testing 4 per cent. Most of these cows were daughters of champion bulls. Mr. Barr does a great deal of business in Canada, and at this year's Royal Show a large proportion of winners was from stock of his breeding.

In the opinion of the dairymen members of our party, Mr. Barr's byres were the best they had seen. Part of the byres are floored with concrete, part with brick. Mr. Barr maintains that brick floors are healthier in winter and results in the absence of trouble in the lower joints of the cattle. It is interesting to note that some of the fairs on the farm have been in great for 70 years. Mr. Montgomery's Leasness farm has been in great for 70 years. It is interesting to note that some of the fairs on the farm have been in great for 70 years.

It was with special interest, therefore, that we visited the Glasgow Corporation's Milkland, where at which cattle and pigs are landed. There are no floor facilities in the British Isles. The accommodation is for 4,000 head of cattle, and 10,000 pigs, a large number of killing stock and excellent cold storage for carcasses before removal direct to buyers, butchers' shops or to the meat markets in the east end of the city.

And now, as guests of the Corporation of Glasgow, we were to attend our last official luncheon in Great Britain. We took our seats in the great banquet hall, the Lord Rostrev, Sir David Mason presiding (To Be Continued.)

The flat, stale taste which you sometimes find in meat may be due to the package it is put up in. Red Rose Tea is of such fine quality that no chances are taken. It is packed in aluminum, the only material that gives complete protection against dust, dampness and deterioration. S.W.

of Robert Burns. The wee clay cottage remains almost as it was in thirty days, even to the furnishings, the kitchen table, the grandfather clock, the wooden chairs, the plate rack and china, the hangings and the bed where the poet was born, the barn adjoining, and the cattle stalls. A small home and a humble one, but to be entered with reverence by any who believe in the dignity of labour and the independence of man. Behind the cottage we visited the museum of Burns, the house where Burns was born, the house where Burns was born, the house where Burns was born.

Our excursions from Glasgow gave us little time to see the city itself, although all of us took opportunity to stroll along the famous Sauchiehall Street, Broad Street, with its shops on both sides, this fine thoroughfare full of interest and alive in its bustle and activity the vigorous spirit of this great industrial city.

Canada's trade connection with Glasgow is close. Glasgow has always been a removal of goods, and is licensed out for stores was greater than at any other port. Glasgow, along with the rest of Scotland, also formed a high opinion of Canadian goods and goods.

It was with special interest, therefore, that we visited the Glasgow Corporation's Milkland, where at which cattle and pigs are landed. There are no floor facilities in the British Isles. The accommodation is for 4,000 head of cattle, and 10,000 pigs, a large number of killing stock and excellent cold storage for carcasses before removal direct to buyers, butchers' shops or to the meat markets in the east end of the city.

And now, as guests of the Corporation of Glasgow, we were to attend our last official luncheon in Great Britain. We took our seats in the great banquet hall, the Lord Rostrev, Sir David Mason presiding (To Be Continued.)

Alberta Elevator Construction

250 New Elevators Have Been Built In Province This Year

Approximately 250 new elevators have been constructed throughout Alberta this year, it is estimated by local grain men. The total capacity of these elevators would be about 18,000,000 bushels. It was stated, however, that the province was not available, but grain men stated that extension of facilities had been progressing rapidly in all parts of Alberta. The capacity of the elevators varied from 35,000 bushels to 140,000 bushels. The Alberta Wheat Pool alone has 110 more elevators this year than in 1927 and practically all the public grain elevator companies have increased their storage capacity.

Combine Reaper Threshers

It is estimated that more than five thousand combine reaper-threshers are in operation in Alberta during the present harvest season.

British Columbia Exporting Eggs

British Columbia is now exporting eggs to the United States. This year that province has already exported over 200 carloads.

SEPTEMBER 16

PAUL WRITES TO HIS FRIENDS IN CORINTH

Golden Text: "Behold, how good and how pleasant it is for brethren to dwell together in unity." Psalm 133:1.
Lesson: 1 Corinthians 7:4.
Devotional Reading: Ephesians 4:1-6.

Explanation and Comments

Exhortation To Unity. 1 Corinthians 7:1-13.—Through members of the household of Chlois, Paul learned that there were contentions among the members of the church at Corinth. It has been inferred that Chlois was a business woman of Ephesus who had sent slaves to Corinth in the pursuit of her trade, and that on the return of the latter they had brought back this news to Paul, who was then at Ephesus. If they had belonged to Corinth, it is argued, Paul would hardly have exposed them to reprisals as by this disclosure in his letter. After his salutation and words of thanksgiving (verses 1-5), Paul turned up this report and appeals to his readers to be at one. "I beseech you, brethren, through the name of our Lord Jesus Christ," he writes, "that you agree in calling Christ your Lord." And that there be no divisions among you.

Paul's gently needed bit of counsel this for our day! I said that in one of the great cities of England a quarrel arose between the women, and at the first fire which they were to light in the hall of the church, the women turned the hose on one another. This is a picture of what many Christian groups are doing today. The remedy is given by the Persian poet Sa'idi:

If the litigious knee the taste of friendship with Paul had.

Think you that their life would be a life of peace and love?

In quarrels without end?—

"That ye be preferred together in love, and in the same judgment," continued Paul.

There were three parties in the church at Corinth, Paul wrote, and which were called by the name of the leader which each admired the most and used as the most important. The adherents of Paul, those of Apollon and those of Cephas, or Peter, were not the least of the church.

U.S. Feels Canadian Prosperity.

Farm Implements Imported From U.S. Reach High Valuation

A reflex of the prosperity prevailing in Western Canada which touches the United States is indicated by Canadian purchases of farm implements in that country. In July these purchases are stated to have broken all records during that month the Dominion import shipments of this kind totaled \$5,658,603 in value, making a record of \$29,277,000 for the first seven months of the year.

The bulk of these purchases consisted of tractors and harvesting apparatus. During the month of July more than 1,800 tractors were shipped to Canada, of which 1,422 were most tractors of from 15 to 35 horsepower. Other large items among the Canadian purchases were 3,946 harvesters and binders, 914 combines and 1,914 combines.

These purchases from the United States are, of course, in addition to the purchases of farm implements and machinery manufacturing concerns and represent only a portion of the activity in the farm implement field due to this year's record crop.

Everybody Welcomes Nervous Curb (going out notices) "The year will continue his pleasant series of Friday evening adoptions in the parish hall, and the subject next Friday will be Hell. The vicar hopes to see you all there. The collection will be for the new heating apparatus."

Canada has 600 electric power plants, representing a capital of \$800,000,000.

DIARRHOEA Was So Bad Child Passed Blood

Mr. Harry Whittle, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhea and blood in his stool. He was passing blood. I went to our medicine case and gave him a dose of

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken the third dose he was a different child."

"This wonderful blood complaint remedy has been on the market for over 50 years; put up only by The T. M. L. Co., Limited, Toronto, Ont."

DENIAL MADE OF BAD TREATMENT OF HARVESTERS

Winnipeg.—Statements made at a colonization conference charging improper treatment of British harvesters at an immigration hall in Winnipeg, were declared false by Thomas Gellay, local immigration commissioner.

Mr. Gellay denied the charge made by Thomas Johnston, Labor M.P. for Dundee, Scotland, that British harvesters were kept in an underground cage, guarded by police.

"The immigration authorities have not detained any British harvesters in any way, shape or form, since their coming to this country," the commissioner said.

At the Canadian National Hall, Immigration Hall in the Union station, there is a grilling gate and policemen, two members of the Royal Mounted Police and two Winnipeg police officers, were stationed at the gate recently while arrangements were being made to ticket the 300 British harvesters back to the old country.

"These police officers," said Mr. Gellay, "were stationed at the grilling gate not for the purpose of keeping the British harvesters in the hall, but for the purpose of keeping unauthorized persons out."

Mr. Gellay pointed out that Mr. Johnston was refused admission to the hall because he had not the necessary authority which could have been obtained from immigration or railway officials.

The charge was made by Mr. Johnston at a conference on colonization arranged by the Empire Parliamentary Association. The labor member declared the men were being herded together like sheep and forbidden to go out.

"British citizens," Mr. Johnston declared, "are not in the habit of being treated that way."

Mr. Hon. Thomas Shaw, Minister of Labor in the Ramsey MacDonald government, declared he had accompanied Mr. Johnston and seen the conditions with his own eyes.

Viscount Peel said he had no personal knowledge of the situation described by Mr. Johnston. But he had no doubt that at the proper time an investigation would be held and the matter fully looked into.

Novel Sentence For Thief

Most Work For Employer Until Reimbursement Is Made

Ottawa.—A unique sentence was imposed by Magistrate Hopwood in Carleton county police court, when Patrick Quinn was convicted of stealing \$25 from his employer, Miss Patricia Christopher, of the city of Quebec. The magistrate sent Quinn back to Miss Christopher's farm "to put in 20 days of honest toil to reimburse her for the money stolen. Crown Attorney Ritchie approved the magistrate's solution of the case, and Quinn was allowed to go on his recognizances to work out his own salvation.

To Test Noble Craft

Rome.—The dirigible No. 5, a sister ship of lost Italia, is being prepared for a final attempt to locate those of the Italia's crew last seen with the gas bag, says Claude d'Italia. The dirigible will have Maubach motors and in a few technical details will differ from its ill-fated predecessor. It is said General Nobili himself is supervising the work.

Purchase Northern Mine

The Pas, Man.—Colonel Orbelland, of New York, representing certain mining interests in the American city, has purchased the Pat. F. Neopap and other groups of claims near Athapapuskow at Soudrough from the Baker Paper interests for a sum which is reported to exceed \$500,000.

Driver Did Not Stop

St. Louis, Mo.—A hit-skip motorist whose automobile struck and killed Jeremiah Horton, allowed his body to slide on the front bumper of his car for 50 feet and then fall under the automobile, where it was run over by the wheels of the car, witnesses said. The driver of the car did not hesitate.

Canadian Is Appointed

Geneva.—Hon. Philippe Roy, first Canadian Minister to France, was appointed official reporter on the question of settlement of Bulgarian refugees and the Bulgarian stabilization loan, at a session of the League of Nations Assembly.

W. N. L. 170

Rush Serum To Winnipeg

Aid For Sufferers From Infantile Paralysis Sent From East and West

Winnipeg.—Children of two come to Winnipeg, and have come to the rescue of infantile paralysis sufferers in Manitoba.

Serum, made from the blood of recovered victims in the eastern and western cities, will be rushed to Winnipeg to aid in checking the spread of the disease and hasten the recovery of its present victims here and at rural points.

Aid from the two cities follows request made by health authorities in Winnipeg. Numerous recovered victims in Winnipeg have already given of their blood to make the serum, but as a precautionary measure it was thought necessary to send a further supply from outside points.

In Manitoba, chiefly in the city of Winnipeg, there have been 116 cases of infantile paralysis, with thirteen deaths, since the epidemic was reported in mid July. Health authorities consider the epidemic is abating.

U.S. Fishing Boat Seized

American Boat Seized By Customs Patrol At Coast

Victoria, B.C.—Seized by H.M.C.S. Thetis and Canadian customs patrol boat Despatcher while in love on the west coast of Vancouver island near Clayoquot, two United States fishing vessels, the Marmot from Tacoma, and the Chief Seattle, were brought into Victoria harbor recently.

The two boats and the two occupants of each were handed over to the collector of customs for detention, while the boats were referred to the Federal Department of Marine and Fisheries at Ottawa.

The two fishing crafts were found to be without the necessary permits in Canadian waters recently, and although they were not fishing at the time, they looked suspicious and they were seized. The occupants said that they had taken shelter in the cove from a storm which they thought was approaching.

Distribution In October

Saskatchewan "Foot Month" Will Be Paid

Regina.—Although a despatch from Calgary stated that \$1,000,000 in profits would be distributed to Alberta pool members within the next 10 days, D. McEwen, manager of the Saskatchewan Pool Elevators, states that distribution to Saskatchewan members will not take place until next month.

Stating that each province determined on its particular policy, Mr. McEwen said: "Our policy for this is not announced until the financial figures are complete." It will be 10 days or two weeks before the Regina pool will have a statement. The statement has to be submitted to the delegates of the Pool before it is made public.

American Aviator Under Arrest

Cherbourg.—Bert Acker, American aviator, was released on bail but must face trial here because he flew over the Fortress and landed on the naval field without authorization. Three men who had flown here with Acker and Charles A. Levine, who sailed for New York, posted \$40 bail for the American, who said he had no money with him.

Drilling For Oil At Unity

Unity, Sask.—Unity Valley No. 2 well shows oil sands in falling from nine inch casing at depth of 2,160 feet. Shad from tailings smells plainly of crude petroleum. A test with chloroform shows good oil extracted with no water to fight, and appearances are all favorable. Drilling is continuing carefully. Gas is showing as in former well. Expect oil soon.

Industrial Disputes

Ottawa.—Tool steel in industrial disputes in July, 1928, was eighty times more than during June, 1928, but almost double that during July, 1927. Eighteen disputes were in existence at some time or other during the month, involving 2,448 workpeople and resulting in a loss of working time of 23,793 days.

Says Negroes Support Smith

London.—The black man's vote for the United States presidency goes to the Democratic candidate, according to Marcus Garvey, self-styled "Moses" of the colored race, who made a dramatic London appearance, saying that he represents 11,000,000 negroes, who in turn represent 400 million more.

Interested In Wheat Pool

British Government Might Buy Wheat From Pool If Ramsey MacDonald Becomes Premier

Winnipeg.—If R. J. Q. J. Ramsey MacDonald again becomes premier of Great Britain, his government may try his wheat requirements from the wheat pool.

Mr. MacDonald on arrival in Winnipeg had lunch with representatives of the pool. It is understood he discussed the question, in which he has shown a lively interest. He is anxious to know at first hand the prospects of such a step eventually being taken.

The question of direct relations between the British government and Canadian co-operative marketing agencies has been increasingly discussed in recent years. It is favored by many as an important step in Empire relations, but on the other hand is looked at askance in some quarters as savouring too much of socialism.

Is Not Resigning Post

Sir Austen Chamberlain Expects To Resume Work In November

London, Eng.—Following alarming reports regarding the health of Sir Austen Chamberlain, foreign secretary, it is learned in medical and other well informed quarters that there is no reason to suppose that the minister will not return from his trip to the West Indies and North America in good health.

An attack of bronchial pneumonia following strenuous work during the past year left Sir Austen in a weak condition, but it is believed that rest and change will restore him to health, while the duties of his office on his return in November.

RECORD CROP IS BEING GARNERED IN THE WEST

Winnipeg.—The rush to move what is estimated as the largest wheat crop in the history of the Canadian West is on in earnest with many thousands of bushels of grain being marketed daily. The rush is earlier than ever before, railway officials said.

With threshing reported general all over the West, cutting completed in Manitoba, and more rolling stock and general equipment made at strategic points on the prairies than ever before, indications are that the whole operation of taking off the crop and marketing it will be completed in record time.

Cutting is reported as practically completed in Saskatchewan and well advanced in Alberta. Interior drivers are swept clean and ready for the pouring-in of the new grain. Stocks in the lake head terminals have been reduced to 4,531,000 bushels.

Reports of wet yields are favorable on the prairies and at most points the grading is high.

CANADIAN PRIMA DONNA GUEST OF LLOYD GEORGE

Barbara Austen, native of Ontario and Canadian prima donna, who in private life is known as Miss Gwladys Jones, was recently the guest of Dr. David Lloyd George, Britain's war-time premier, at his home in Churt, Surrey. The visit was a sequel to a previous meeting in Canada when Miss Jones sang with Dame Clara Butt at a mass meeting where Lloyd George was the speaker.

Receives Ottawa Appointment

Prof. Lester B. Pearson of the University of Toronto, who has been appointed a first secretary of the department of external affairs at Ottawa.

Mr. Pearson is a professor of modern history at the University of Toronto. He is a graduate of various universities and has been a member of the university football squads for several years and was graduate coach of the hockey team last season. He is a graduate of various universities and has been a member of the university football squads for several years and was graduate coach of the hockey team last season.

It was during Premier Rhodes' regime that the Legislative Council was abolished, and the manifesto introduced by a reference to this.

Handwriting By Telegraph

Farthest Messages Now Despatched Over New System

New York.—A telegraph service whereby a message is delivered in facsimile characters was inaugurated by the Postal Telegraph and Cable Company.

By this new system a person may send a message on a blank in New York at the same time it is being delivered to a regular telegraph line the same message can be delivered in various parts of the country through a telephone process.

The cost of this new service is one and one-half times the ordinary telegraph rate.

The same company also introduced recently a photograph service whereby pictures may be transmitted.

Explorer Seeks Clemency

Dr. Cook Asks President Coolidge To Shorten Sentence

Port Worth, Tex.—Dr. Frederick A. Cook, Arctic explorer and oil promoter, now serving a 10-year and nine months prison, Leavenworth, recently sent an appeal for executive clemency to President Coolidge.

The petition, prepared by Dr. Cook from his cell at Leavenworth, asks that the president commute the sentence to the time already served and rescind time and costs assessed in United States district court.

Final Post For Mr. Andrews

Washington.—William McAndrews, former superintendent of Chicago schools, who was forced out by Mayor William Hale Thompson, is being considered, among others, for the post of United States commissioner of education. It is learned at the State department.

Dr. J. J. Tigert, of Tennessee, recently resigned.

Nova Scotia Legislature Has Been Dissolved

Provincial Election Is Set For October First

Halifax, N.S.—The Nova Scotia Legislature has been dissolved. It was announced by Premier E. N. Rhodes, here, following a session of the executive cabinet.

A provincial general election is set for October 1, with nomination day on September 24.

Coinciding with the announcement of dissolution, Premier Rhodes, who leads a Conservative administration, issued his manifesto to the electors in June, 1925. He compares the present condition of Nova Scotia with that in which the province found itself prior to his taking over.

It was during Premier Rhodes' regime that the Legislative Council was abolished, and the manifesto introduced by a reference to this.

Famous Watch Maker Dead

Robert Ingersoll, Originator Of The Dollar Watch, Passes Away At Denver

Denver, Colo.—Robert H. Ingersoll, watch manufacturer and originator of the well-known dollar watch, died here at a sanatorium where he had been a patient since June 17.

Mr. Ingersoll was 69 years old and was born on a mortgaged farm in Michigan. Ingersoll and his brother Charles, capitalized Ingersoll's idea of a watch which could be made cheaply. The firm of Robert M. Ingersoll and Brother manufactured and sold more than 70,000,000 dollar watches.

Realizing Wednesday's swim was unsatisfactory from all points of view, the committee decided that a race to five miles should be held later on.

Given Command At Coast

Major Ball Has Been Promoted To Rank Of Lieutenant Colonel

Ottawa.—Announcement was made by the Department of National Defence that Major C. E. Ball has been promoted to the rank of lieutenant colonel and to command of the 11th machine gun battalion in Vancouver.

He will succeed Lieut.-Col. H. T. Logan, who has been transferred to the reserve of officers. Lieut.-Col. Ball served with the 11th Battalion, C.E.F., in France and Belgium, being wounded and invalided home in November, 1917.

ENTRANTS FAIL TO FINISH COURSE IN WRIGLEY SWIM

Lake Shore, Toronto.—Lake Ontario was victor in the third Wrigley's marathon swim. Its daily weather and the defeat of some of the world's most famous swimmers and none of the 199 starters had sufficient stamina to finish the 15-mile struggle.

Georges Michel, French conqueror of the English Channel, who last year was the second in the 21-mile marathon, was taken from the water at 10:15 p.m., after completing 12 1/2 miles of the course in 11 hours, 12 minutes.

He had been the sole survivor since 6:42 p.m. when Ernest Vierkotteer, of Germany, the 1927 champion, and Louis L. Mathias, of Long Island, N.Y., had fallen victims to the cold.

Vierkotteer was forced out after being morose of the prey during the first 2 1/2 miles of the course, completing two-thirds of the course. Michel was then the only swimmer left in the race.

The Frenchman, his flagging energy being constantly renewed by stimulants which consisted mostly of brandy, was swimming slowly and unsteadily under the glare of floodlights early in the night.

At 8:45 p.m., nearly ten hours after the marathon race started, the French swimmer had about four miles to go.

ROYAL PRINCES SAIL ON GOODWILL TOUR OF AFRICA

London, Eng.—The Prince of Wales and his executive cabinet, including the Duke of Gloucester, have sailed to hunt big game in Africa and also to spread imperial good will. For days the two adventures and popular sons of King George have been packing for the trip, while the newspapers of London have been carrying accounts and pictures of the regions and the black people they will see.

Sailing from Marseilles, the Prince and his brother will go to Alexandria and then to Cairo and from there by motor to Jomala on the Suez Canal. Here the British Indian states Malha will embark them for Mombasa and there they will entrain for the interior of Africa.

Their baggage includes many fine sporting fire-arms and many an unexplored least now roaming the native wilds is destined to fall before the aim of the Imperial hunters before Christmas finds them ready to return with the trophies of the chase.

The trip for the Prince of Wales holds heavy burdens of official duties. He is burning with speeches, prepared for reviews and inspections, and ready with the smiles that have spread his popularity widely.

The Duke is looking forward avidly to his introduction to big game shooting.

A big shooting expedition has been arranged for Nairobi in October. After that Kenya, Tanganyika, Uganda and Rhodesia will welcome the royal party. The Prince and his brother, Christmas as guests of the governor at Capetown.

To Divide Marathon Money

Fourteen Swimmers In Wrigley Marathon To Receive \$2,500 Each

Toronto.—Fourteen swimmers who distinguished themselves in the third Wrigley Marathon are to be rewarded with gratuities of \$2,500 each by the Canadian National Exhibition.

The exhibition aquatic committee decided to distribute the \$35,000 in prize money in this manner rather than to divide it among the 199 who dropped out hours before and miles behind them.

Realizing Wednesday's swim was unsatisfactory from all points of view, the committee decided that a race to five miles should be held later on.

Plane Parts a Mystery

Wreckage Washed Up At Chatham, Mass.—Has Not Been Identified

Chatham, Mass.—The mystery attached to pieces of airplane wreckage washed ashore at North Chatham has been deepened by the fact that the manufacturers that the fragments were positively not parts of the ill-fated Dawn, the biplane which disappeared. The fragments are thought to be parts of wings. They bear numbers, which are not clear, but are either 52625 or 62625-97. No manufacturer's name could be found on the wood.

Russia Sings Peace Treaty

Joins Nations Who Have Pledged Adherence To Kellogg Pact

Moscow.—Soviet Russia formally joined the group of nations pledging adherence to the Kellogg anti-war pact. Foreign Commissioner Litvinoff signed his signature to a written declaration which was given to French Ambassador Herbetot for transmission to the United States.

Negotiations with the Soviet government have been carried on through France because the United States does not officially recognize the Soviet government.

Dentists To Accompany Byrd

Roald Amundsen Byrd above off on his approaching Antarctic expedition his equipment will include a \$10,000 dental laboratory. It has been known here that dental surgeons will be members of the expedition, which would have nothing to fear from tough walrus steaks or other hairy fare.

Egypt Will Sign Pact

Cairo, Egypt.—The newspaper Al Baswah says the Egyptian Government has handed the American charge de affaires its reply to the invitation to sign the Kellogg-Briand pact renouncing war, the reply being so worded as to safeguard the full rights of Egypt.

The Western Wheat Harvest

Influence of Hot Droughts Is Not Everywhere

"So many harvests have now been overgrown that it is almost taken for granted that the Western wheat harvest of this year constitutes a record by a considerable margin. An increase of 2,000,000 acres seeded would require a major setback to bring anything but a record, still the colossal undertaking of the Western farmer must always face serious dangers and only when these are past is rejoicing in order."

There have been local hail storms and regional wet stretches, but, as a whole, the conditions have been excellent, and the fall is of a crop of 600,000,000 bushels of wheat, compared with 400,000,000 last year, and with 470,000,000 in 1923, the year of the greatest previous production.

The harvest as it becomes a reality is the source for the golden stream of grain bringing enormous wealth whose influence is felt everywhere. The farmer has the needful for all his purchases, his interest on borrowed money, something for payment on past debts, if any, perhaps something for luxuries before Christmas. Traditionally felt the current of new money in bill paid, midwestern cash a fraction here and there and plan new expenditures. Manufacturers foresee extended markets, distant cities will realize increased employment. It is as if the golden stream of grain running through the nation's veins, for the wheat crop will represent about one-third of the wealth of the entire Dominion from primary sources for the year. No Canadian can be indifferent to it.—Toronto Globe

Has Long Finger Nails

Chinese Gentleman Grows Them To Length Of 52 Inches

One of the famous myths of the rue de la Paix in Paris, which is known around the world for the antiques and curiosities it sells, recently received an offer from China of the longest fingernails in history.

The Chinese correspondent wrote that the two nails of the last two fingers of his left hand have attained a length of 74 centimetres (29.5 inches) and he desires to dispose of them now at a profit. He hopes to sell them for \$300 and suggests that perhaps some American museum would be interested in them.

Young Immigrants Make Good

Seem To Be More Successful Than Older Ones

The notable successes that have been won in this country by immigrants have been won mostly—though not exclusively—by those who came here young. Now and then a case is reported in the press in which a boy from the old country appears to have been badly used by the farmer in whose charge he has been placed. As a rule, we believe, they are well used and the steps taken to see that injustice is not done these immigrants are constantly being made more effective.

Strange Cause Of Fire

More than 2,000 acres of forest land in California were swept by fire recently, the blaze being started by sparks from a horse's hoofs, according to the report of the state forester, says Popular Mechanics Magazine. This is believed to be the first verified instance of an occurrence of this kind, although other fires, starting in this manner, have been reported.

The man who used to rock the lost now gets more fun out of doing so on a slippery road.

The young man who is too loath to propose goes without saying.

In the past year Australia shipped its products to 58 countries.

It is one thing to be full yourself and another to be self-contained.

"I would like a seat in the pit if there is one left."

"You can have the whole pit if you like."—Die Muckel, Vienna.

W. N. U. 1759

The Newest Reason

Cheque Was Returned By Bank Marked "State Debt"

I have heard of checks being returned from banks, for various reasons—forgery, wrong signature, no account, insufficient funds, or a check being dated ahead, but here is a fresh one that surprised me and I took the matter up with my bank. The other day I cashed a check for ten dollars for a friend of mine and the check was returned by the bank marked "State debt." I looked at the check and saw that the man had made it out May twenty-eight, nineteen hundred and twenty-seven. I always thought that a check previously dated was okay, so now, dear friends, as soon as you receive a check look at it and be sure it is not "state" and when you do get one deposit it immediately, for if you hold it too long it will lose its freshness and be returned—state.

Would Make Himself Popular

American Woman Trying Experiment To Exterminate Mosquitoes

An American woman who lives on Long Island is going to try to rid her neighborhood of mosquitoes by a new method. She is getting from a French scientist a breed of cannibal mosquitoes which eat other mosquitoes instead of going around biting humans.

There's an idea that we really like. To exterminate mosquitoes is a praiseworthy idea under any circumstances but to do it by turning more mosquitoes loose on them, so that the little pests will have to endure the very thing which they have been inflicting on the rest of us—well, it's just simply dandy, that's all.

More power to the cannibal mosquitoes. May they

Oak is stronger than ash.

The breaking point of the former is 250 pounds, that of ash 175.

Why is it that authority feeling is so often one of envy and curiosity?

Bay Route Is Practicable

Outlet From Hudson Bay To Atlantic Ocean Is Open For Five Months Of The Year

With the return to Ottawa of the Hudson Bay aerial patrol, the period of investigation in those northern waters will be completed, and the officials of the government will have proved to their complete satisfaction that the outlet from Hudson Bay to the Atlantic Ocean is navigable for at least five months in the year, and perhaps longer.

Precious to the aerial patrol, the limit of proved navigation was placed at about three months. While the airplanes are returning to civilization, the government is still keeping close watch on the strait, through the agency of the Montclair, a government cruiser, which will steam to and fro in the strait until freeze-up. In the late autumn, the Montclair will return to the St. Lawrence, leaving the strait for the last time in primeval solitude.

Next year the government will commence building permanent improvements to navigation in order to have the strait ready for ships by the time the Hudson Bay railway and terminal are completed.

Starting Aerial Merchant Fleet

Egyptian Government Pushing Plans For Construction Of Two Aerodromes

In view of Egypt's geographical importance as an air route the government is pushing its aviation plans, which as drafted provides for the construction of two aerodromes. One of the aerodromes will be built near Cairo, and the other near Alexandria, costing 800,000 and 400,000 respectively.

The ministry of communications is contemplating the purchase of three aeroplanes which would form the nucleus of an aerial merchant fleet.

All married men are prolific inventors of excuses.

Storing Canned Products

Heat, Light, and Dampness Must Be Excluded To Preserve Canned Fruits and Vegetables

A cool, dark, dry place is ideal for the storage of canned products. Heat favours the growth of bacteria; light causes fading; while dampness further the growth of moulds and may even cause rust on the metal fastenings of jars.

Do not allow canned goods to lie about under uncertain conditions, wash the jars and label neatly with name of product and date when canned. If dark storage is not available wrap all jars in paper to exclude the light. If a damp atmosphere is positively unavoidable examine the rubbers on the jars from time to time, as mould may attack them, making possible the admission of air and bacteria to the contents of the jar.

A container for canned goods should be of a size to suit the needs of the household; not so large that its contents cannot be consumed shortly after opening, or deterioration and spoiling will occur.

It is a wise precaution to boil canned vegetable products for a few minutes after they are removed from the jar. This does not imply that they must be eaten hot. When the vegetables are required for salads, etc., they may be set aside after being thoroughly chilled before use. These and other phases of canning fruit and vegetables in the home are described in Bulletin No. 77 "Preserving Fruits and Vegetables in the Home," obtainable from the Publications Branch, Department of Agriculture, Ottawa.

Brass and Copper

Brass and copper products produced in Canada in 1927 were valued at \$2,405,467. This is the highest value ever recorded for the Canadian industry.

Get a child to ask you questions if you have a bad case of swelled head.

It is easy enough to get your fill of empty compliments.

Plants Sent From Canada

Prize Flower Will Decorate Soldiers Graves In France

Pilgrims from Canada to the graves of those who gave up their lives in the great struggle for freedom will find blooming on the last resting places of the dead a familiar little prairie flower as a result of the action taken by the Imperial War Graves Commission at the instigation of W. L. Ramsay, of Hildburgh.

In July last, Mr. Ramsay forwarded to St. Omer, France, a large parcel of seeds of Anemone Pulsatilla, which were divided up so that all parts of the field in which Canadian soldiers had received an adequate supply.

When the seed was distributed from headquarters a letter was forwarded to all officers of sectors instructing them to raise the seed and set the resulting plants among Canadian graves. It is expected as a result of the quiet landscapes in which our heroes are buried.

J. S. Parker, chief horticultural officer of the Imperial War Graves Commission, says in reply to Mr. Ramsay's letter:

"Please accept my very warmest thanks for the most welcome gift. It will be a great satisfaction to you to know that if we succeed in raising the number of plants, we believe is possible from your seed, a very large number of Canadian graves will be decorated with this little prairie flower."

"It should be a source of great satisfaction to any next-of-kin from the prairie provinces visiting a grave in France or Flanders, to find growing upon it one of the most beautiful of the prairie spring flowers."

You who have by your interest and generosity made it possible for me to provide the plants."

The Yak In Canada

Developing A Hardy Breed Of Cattle For Northern Sections

Interesting experiments have been conducted at Buffalo Park, Wainwright, with the Yak (boagrus), the ox of the plateau of Tibet.

Under experimental farm direction crossbreeds of crosses between the yak and the buffalo have been secured, also crosses between the yak and domestic cattle.

What may be the future development in this breeding work toward the extinction or elimination of yak blood will be largely determined by progress in breeding work. However, the work to date has afforded a most interesting study of considerable value in animal breeding, and it is quite possible that in future years there may be developed a hardy containing largely the domestic blood of the improved breed, but with an infusion of bison and yak blood sufficient to give that hardiness ability to withstand storms, ability to forage in the winter, and the general thrift and vigour which may be of some commercial value to the colder and northern sections of Western Canada where the beef industry will for all time be one of the important phases of agriculture.

Encourage Winter Feeding Of Cattle

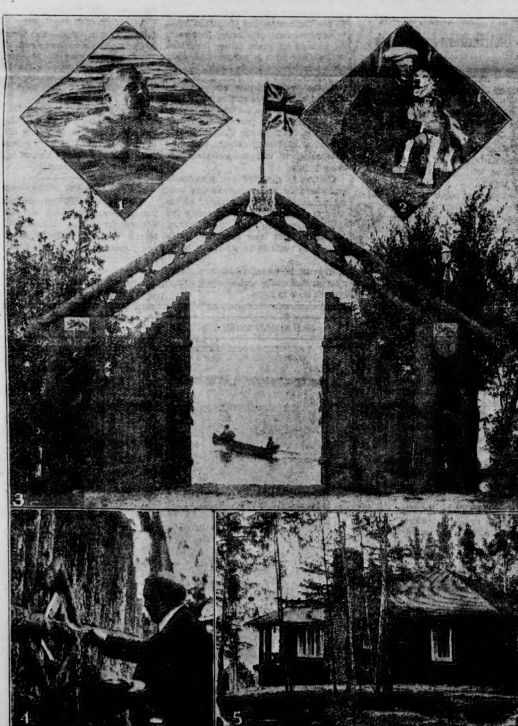

Cattle Expert Makes Interesting Proposal At Saskatoon

H. P. Kennedy, Toronto, famous cattle expert, has made a proposal to the Saskatoon Exhibition Board that 1,000 head of young cattle be distributed among farmers' sons in every district in the north of Saskatchewan.

The suggestion follows the success of the boys' and girls' cattle feeding competitions. The idea is also to encourage the winter feeding of cattle on the western farms and develop a livestock market here.

We have never known a sensible pursuer of happiness who ever figured up what his car cost him in the course of a year.

CANADA'S NEW NATIONAL PARK

Prince Albert National Park, Saskatchewan, with an area of 1,377 square miles, is the latest addition to the National Parks of Canada. It was opened by the Right Honourable W. L. Mackenzie King, Prime Minister of Canada, on August 10th, before a gathering of more than 2,000 people, who had come from all parts of the Dominion to attend. The photographs show some of the incidents on opening day.

1—Premier King enjoying a swim in Lake Waskesiu. 2—Vernor Johnson and his dog Prince. Johnson was presented with a certificate of the Royal Humane Society of Canada for saving the life of Mrs. Rose Littlewood last winter, and a collar was presented to "Prince," the leader of Johnson's dog team which played an important part in the episode. 3—The arkway and gates which were opened by the Prime Minister. 4—Premier King mounting the key in the gates and officially opening the park. 5—The cottage on Lake Waskesiu which was presented to the Prime Minister by the people of Saskatchewan.—Photographs Canadian National Railway.

Practice Is Unwholesome

Pampering Youth Will Never Build Up Useful Citizens

Lord Lovat touched upon a very interesting point when he expressed himself as opposed to the spoon-fed boys after they have reached the age of eighteen, when they seek their independence and want to cut bone from central. The principle is sound, whether it is applied to youths in institutions or lads in their own homes. There seems to be a great deal too much of this spoon-feeding among Canadian boys, and the practice of calling youths of twenty to twenty-five "young boys" is essentially unwholesome one. It is unfair to the youth, and it weakens his capacity to undertake responsibility on his own account.

Pampering youth will never build up useful citizens. The tendency of youth to relieve youth of responsibility because of youthfulness is not destined to assist in the development of a robust and responsible manhood. Women are largely to blame in this connection, their indulgence of irresponsibilities in lads of eighteen to twenty, whether the element of affection or tolerance leading itself to an arrestment of the development of a proper sense of responsibility. As Lord Lovat whimsically remarks, some people ought to be looked after all their lives. But the country which has many such is not likely to be in the forefront of the race.

Conditions Are Different

Intending Settlers Cannot Rely On Like Early Pioneers

The day is past when settlers can be expected to be successful if they are dumped down on any sort of land and without any capital. The highest standard of living today as compared with a generation or two ago has made a difference in this field as in every other. Generally speaking, the intending immigrant of today is not prepared to face the grim conditions that were accepted as part of the game by the early pioneers, greatly changed. Mechanization has Methods of farming, too, have really effected a revolution, and newcomers can hardly be expected to muddle along with the old "bow and arrow" method until they acquire the capital necessary to provide themselves with modern appliances.

The only man that doesn't make a fool of himself occasionally is the one whom nature waxes the trouble.

If you trust to luck for your happiness you'll be in luck if you get it.

A cycle is a person who is never happy unless he is very unhappy.

REO TRUCKS

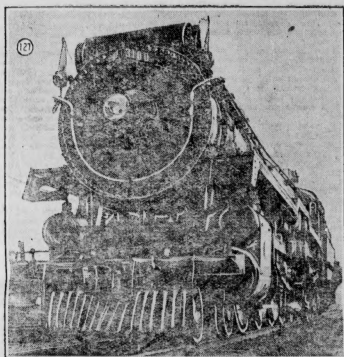

More economical transportation for 93 per cent of all trucking uses

—Equipped with—
Hydraulic four wheel brakes.

EMPIRE'S LARGEST

Built from designs originated in the motive power department of the Canadian Pacific Railway, the 3100 is the largest passenger locomotive in the British Empire and the most powerful. Canadian workmen turned her out of Angus Shops, a graceful mechanism nearly one hundred feet long, with a tractive effort of 60,500 pounds equal to 3,583 horse power. The use of Canadian nickel steel parts has reduced its weight to 42,600 pounds, but the high rate of tractive power, to weight is a notable feature of the new engine. The boiler pressure, 275 pounds, is the highest of any locomotive in Canada. The eight drive wheels have a diameter of 75 inches and the cast nickel steel cylinders are 25½ inches by 30 inches. The length over all of the new Canadian Pacific engine is 97 feet 5 inches. Two have been built at present for the Toronto-Montreal run.

Trail Riders of the Canadian Rockies Visit Lake of the Hanging Glaciers in British Columbia

Hundreds of lovers of the great outdoors have joined the Trail Riders of the Canadian Rockies, an organization of poets, novelists, scientists, educators, artists, Indian chiefs, cowboys, nature lovers in general, and those who wish to perpetuate ancient trails in the Canadian Rockies and get the grand kick of a wonder-

ful horseback ride through the Canadian Rockies to scenic wonders which have been viewed by mere haphazard. John Murray Gibson, of Montreal, first organized this great ride, which this year started August 2, for the Lake Banff and Lake Windermere, B.C. Each year it has been bigger and

better and the membership now exceeds a thousand, many of whom have won the gold and enamel button signifying that they have ridden at least fifteen hundred miles. Of the hundred so qualified, 23 are ladies. Three of the men who joined up with the main party this year on the start for the Lake had already covered upwards of 200 miles of mountain trails.

The Lake of the Hanging Glaciers, about 7,000 feet above sea level, in the Selkirk Range, was discovered 30 years ago, but is still as wild as ever. It has given some idea of its spectacular appearance, which is that of an immense circus, with eight glaciers forming a moraine which drops off sheer in an ice wall nearly 500 feet higher than the lake itself. From this wall icebergs are falling continually, and forming a miniature Arctic sea in the heart of the mountains. Surrounded as it is by jagged Alpine peaks, many of which exceed 11,000 feet in height, this lake has challenged the attention of many Alpine climbers.

About Town and Country

John F. Miller, sight specialist, of Calgary, Alta., will visit Oyen on Saturday, September 22. Get your children ready for school and don't forget to come early.

Mrs. J. C. Desso, who has been visiting her daughter and son-in-law, Mr. and Mrs. H. Hancock, in Edmonton, returned to town last Friday.

Dr. and Mrs. W. D. McPhail and daughter Jean, of Kindersley, were the guests of Mr. and Mrs. Chas. L. Dunford, last Sunday.

Mr. Thos. Lees, who was a business visitor in Calgary over the week-end, returned to town yesterday.

Mr. and Mrs. H. A. Morrison and son returned to Oyen last Thursday from Alberta Beach, Mr. Morrison has resumed duty at the C.N.R. depot.

Mr. M. G. Whitlock, left last Wednesday for Toronto, where he is attending a trades and labor conference. He expects to return during the latter part of next week.

Mr. and Mrs. T. Leslie of Lashburn, Sask., were guests at the home of Mr. and Mrs. C. L. Dunford last week.

On Friday of this week, the theatre management will distribute dodgers for their Friday-Saturday show, "Lost at the Front" (Charlie Murray and George Sidney). Look those over when left at your home; among those distributed around town will be ten free passes to the show.

In the absence of Mr. M. G. Whitlock, Mr. W. R. Bryant is in charge at the local depot.

OYEN DRAY LINE

Motor Truck Service

Wheat Hauled

Water Delivered

—Leave orders early—

W. D. MORRELL

The total handlings for the 100 Alberta Wheat Pool Elevators last year was 57,824,000 bushels. This year the Pool has 300 local elevators. To participate in the Pool Elevators excess profits Pool members must deliver their grain to Pool houses or ship direct to Pool terminals and send bill of lading to the Pool Elevator head office.

Plano's—I am agent for the following lines: Stearns, Martin Orme (now Matthews), Nordheimer, Sherlock Manning and use Heintzman. See me before buying. Geo. J. Benbow.

Here and There

(129) The latest recruits to the ranks of the internationally known Trail Riders of the Canadian Rockies are the three daughters of Ramsay MacDonald, former premier of Great Britain. They rode from the Chateau Lake Louise to Lake Agassiz to qualify for membership.

One of the sheep ranchers of the Cascade district is at present in the Crow's Nest Pass where he is running a large flock of sheep on summer range. This is the first year that an independent rancher has moved sheep to the mountains for the summer and the experiment is being watched with a good deal of interest.

The first of a new series of engines, has left the Angus shops of the Canadian Pacific Railway and will shortly enter into service between Montreal and Toronto. It is the largest passenger locomotive in the British Empire, 97 feet in length, weighing 42,600 pounds, and has eight great driving wheels 6 feet 3 inches in diameter. It is an entirely Canadian product, designed by Canadian Pacific engineers.

Fifteen flying clubs have been formed in Canada since May when the Government's plan to encourage civil aviation was put into effect. While applications for two more clubs are at present being considered by the Air Board, over one hundred Moth planes are in use throughout Canada. Air Board officials stated. Half of these are privately owned. More than one hundred members of the clubs are solo fliers.

A resolution petitioning the Canadian Daily Newspaper Association to hold its 1929 convention in the Maritime Provinces was passed at the Mid-summer meeting of the Ontario Provincial Daily Newspaper Association held on board the Canadian Pacific ship "Kerwatin" en route to Montreal. The resolution was introduced by Mr. F. H. Leslie, president of the association, referred in his speech to the arrival of the members for a matter acquainted with the Maritime Provinces.

The world wide service provided by the Canadian Pacific Railway will be further improved with the establishment of a new hotel by the Company in London, England. To meet a traffic of Canadian and American travellers traveling between this continent and the British Isles, built up by Canadian Pacific Steamships, that the construction of a new hotel in the heart of the Empire has been considered for some time. And now that the 1930 Royal York is well under way the project has been taken into hand. Operations should start next year.
